## MongoDB 101

Presented by Dan Patsey,  
Self-Proclaimed Entrepreneur and Semi-Technologist

**When:** November 17th, 2011 @ 5:30PM

**Where:** ITT Tech, 13 Airline Drive, Albany, NY 12205

### **Presentation:**

NoSQL, MongoDB, Cassandra, Redis, Document Store, Key-Value Store... Chances are you've heard of one of these terms in the past year or so. These technologies are the latest craze in software development. Are they just a fad? Who the hell knows? That's not in the scope of this presentation. In this presentation, we'll cover the basics of one NoSQL solution – MongoDB. I'll give an overview of MongoDB, discuss how it's different from traditional RDBMS, talk about document design and administration including scaling, replication and sharding.

### **Agenda:**

5:30 - 6:00 - Food/Network

6:00 - Intro/Sponsor

6:00 - 7:30 – Presentation/Q&A

7:30 - Close

### **About the Presenter:**

Dan Patsey is just a local software engineer.
